DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bontaz in view of Kaneko.

The patent by Bontaz (5,881,684) shows an internal combustion engine piston that is provided with a cooling duct (10).the cooling duct can have a free cooling oil stream applied to it by way of the oil inlet, by means of an oil spraying nozzle rigidly connected with the engine housing from the crank space, through the free interior of the piston shaft.

The patent by Bontaz does not specifically disclose the inner wall surface of the oil inlet is shaped according to a function of a one-sheeted rotating hyperboloid or of a surface –delimited torus. The patent by Kaneko (6,494,387) shows that the hyperboloid shape helps promote fluid transfer there-through (Col. 3, lines 18-37). In view of Kaneko, it would have been obvious to anyone skilled in the art who wanted to promote better flow through the inlet to improve on Bontaz by shaping the inlet inner wall according to a rotating hyperboloid.

The cross sectional areas of the oil inlet are arranged approximately in the plane of the circular cover of the cooling duct.

Allowable Subject Matter

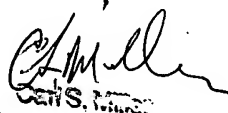

Claims 2, 3, and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
